

DIAMOND
GLOW®

instant glow.
lasting results.

Actual DiamondGlow® patient.

Uses

The DiamondGlow® device is a general dermabrasion device that gently removes the top layer of skin and delivers topical cosmetic serums onto the skin.

Please see the back page for Important Safety Information and the SkinMedica® Pro-Infusion Serums Disclaimer.

the *all-in-one* dermabrasion treatment

Skin naturally sheds dead cells in a 28-day cycle. That's why regular, mild exfoliation helps to increase cell turnover, revealing renewed skin.

DiamondGlow® is the clinically proven dermabrasion treatment that harnesses 3X1™ technology, working exclusively with SkinMedica® Pro-Infusion Serums to promote skin health.

OUR 3X1™ TECHNOLOGY SIMULTANEOUSLY:

EXFOLIATES

Our diamond tips provide a physical exfoliation to remove the top layer of dead skin.

EXTRACTS

Vacuum suction gives a deeper clean by removing dirt, debris, and oil from the skin's surface and pores.

INFUSES

Targeted SkinMedica® Pro-Infusion Serums permeate the skin when pores are open and most receptive.

Our treatment supports *lymphatic drainage*, which helps *decrease the appearance of puffiness*, support removal of toxins, and *brighten skin*.¹

ultimate customization

FOR EVERY SKIN CONCERN

Only DiamondGlow® pairs with clinically proven SkinMedica® Pro-Infusion Serums that target the most common skin concerns:

DRY SKIN

HA⁵ HYALURONIC ACID PRO-INFUSION SERUM

DIAMOND
GLOW® / SKINMEDICA®

DiamondGlow® Uses

The DiamondGlow® device is a general dermabrasion device that gently removes the top layer of skin and delivers topical cosmetic serums onto the skin.

DiamondGlow® Important Safety Information

The DiamondGlow® treatment is not for everyone. You should not have a DiamondGlow® treatment if you have compromised skin quality. Tell your provider if you are pregnant or lactating, or if you have any medical conditions, including allergies, and if you are using topical medications on the area to be treated.

Typical side effects include a scratchy, stinging sensation during the treatment and temporary tightness, redness or slight swelling after the treatment. Rare serious side effects may also occur and include severe skin irritation and allergic reactions.

SkinMedica® Pro-Infusion Serums Disclaimer

SkinMedica® Pro-Infusion Serums are intended to meet the FDA's definition of a cosmetic product, an article applied to the human body to cleanse, beautify, promote attractiveness, and alter appearances. These products are not intended to be drugs that diagnose, treat, cure, or prevent any disease or condition. These products have not been approved by the FDA and the statements have not been evaluated by the FDA.

Please talk to your provider for additional information.

SkinMedica® Important Information

CAUTION: Do not use Retinol Complex or Even & Correct Dark Spot Cream if you are pregnant, lactating, or planning to become pregnant. Mild redness, peeling, and irritation are expected when using Retinol Complex. Use a sunscreen and limit sun exposure while using this product and for a week following discontinuation.

Sunburn alert: Even & Correct Brightening Treatment Pads and Even & Correct Dark Spot Cream contain an alpha-hydroxy acid (AHA) that may increase your skin's sensitivity to sunburn. Use a sunscreen and limit sun exposure while using these products and for a week following discontinuation.

Use a sunscreen with an SPF of 30 or higher during any sun exposure when using Even & Correct Advanced Brightening Treatment.

Most SkinMedica® products are intended to meet the FDA's definition of a cosmetic product, an article applied to the human body to cleanse, beautify, promote attractiveness, and alter appearances. These SkinMedica® products are not intended to be drug products that diagnose, treat, cure, or prevent any disease or condition. These products have not been approved by the FDA, and the statements here have not been evaluated by the FDA.
